Project Title: Chappell Roan Website

I want the website to reflect Chappell Roan's bold, theatrical aesthetic through bright colors, expressive typography, and large images. Rather than using a traditional layout, I'd like to incorporate playful design elements inspired by her music videos, performances, and stage outfits. The site will have multiple pages with navigation at the top, allowing visitors to explore different aspects of her career and influence.

- **Home Page/Introduction** – Introduce Chappell Roan, her music, and her rise to fame. Set the tone for her bold visual identity, theatrical performances, and impact on pop culture.

- **Early life and career –** Explore her upbringing, musical influences, and early experiences in the music industry.

- **Music and Discography** – Highlight her albums, popular songs, and development as an artist.

- **Fashion and Performances** – Focus on her distinctive fashion, drag-inspired aesthetics, stage presence, and memorable live performances.

- **Cultural Impact and LGBTQ+ Representation** – Explore her influence on queer culture, self-expression, and representation within the music industry.

- **Sources** – I plan to use sources including GRAMMY, The Guardian, Chappell Roan's official website, Vogue, and NME. These sources will provide information about her early life, music career, fashion, performances, and cultural impact, as well as photography and visual references for the website.
