Project Title: Chappell Roan Website

1. Project Overview

The goal of my website is to be generally informational, but to present Chappell Roan's career and impact through her unique visual identity, music, and performances. I want to highlight how her theatrical style, individuality, and connection to queer culture have contributed to her success and influence in pop music.

2. Resources

Information will come from sources including GRAMMY, The Guardian, Vogue, NME, and Chappell Roan's official website. Photography and visual references will come from these sources, along with additional images found online. Sources and photography will be credited where appropriate.

4. Audience

This website will primarily target fans of Chappell Roan, pop music, and contemporary queer culture. The audience will likely consist of teenagers and young adults, although the content should be accessible to anyone interested in her career. Since this is also a portfolio project, instructors and prospective employers may view it as well.

5. Message

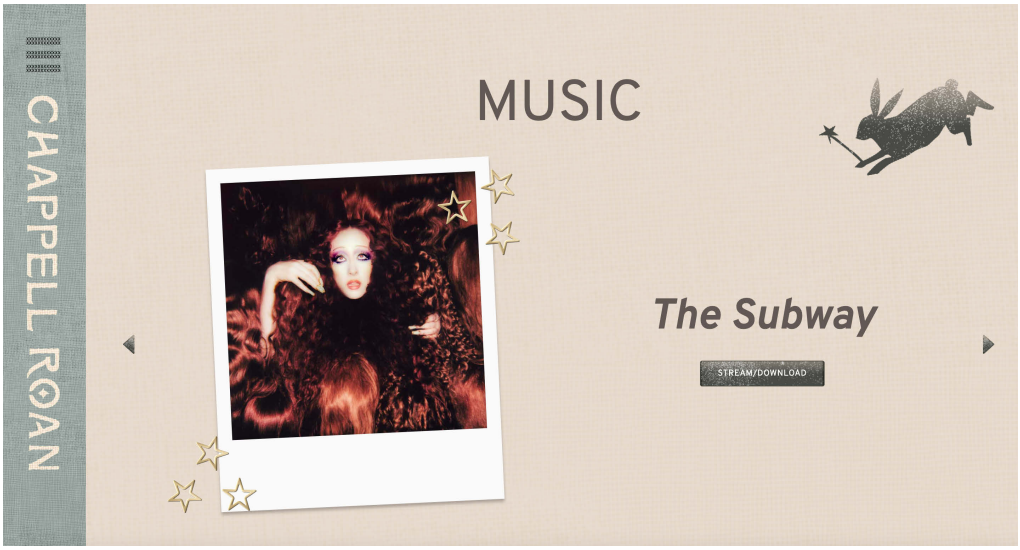

I want to focus on how Chappell Roan has established herself as a distinctive figure in modern pop music. Beyond her music, her use of fashion, drag, and theatrical performances has helped create a recognizable identity while encouraging individuality and self-expression, particularly within the LGBTQ+ community.

6. Tone

I want the tone to be playful, expressive, and somewhat theatrical, reflecting Chappell Roan's personality and performances. Rather than creating a traditional informational website, I want the experience to feel energetic and visually interesting while still clearly communicating information about her life and career.

8. Visual Style

I'm leaning toward a bold, colorful visual style inspired by Chappell Roan's performances, album artwork, and drag-inspired aesthetic. I want to incorporate bright pinks, reds, and contrasting colors alongside expressive typography and large photography.
